SOFTLINE All of the planters, which you see on these two pages, are now available in colors (RAL color coding) by special order. This means that there are no more limits to your creativity when designing your garden or terrace.

WATER OVERFLOWS AND RESERVOIRS ensure optimum water management in the large-sized pots in the Aladin, Delta 60, Bonsai, Squareline Box and Carat lines.

SOFTLINE COLOR examples

HANDMADE IN SWITZERLAND

SWISS MADE All of the planters and designer pieces in this brochure were manufactured exclusively in Switzerland, either in the Payerne (VD) plant or in Niederurnen (GL), where the Eternit (Schweiz) AG headquarters are located. Also, the raw materials, which are used to make fiber cement, largely originate in Switzerland.

HANDMADE Each planter and each designer piece from Eternit (Schweiz) AG is handmade. On the inside of each new pot, you will find a label with the signature of the craftsman, who made it.

1 The raw material is cut while still wet. **2** Precision is required when cutting complex forms, such as the Spindle shown here. **3** The material is pounded into the form, sealed, smoothed and coated before drying. **4** The piece can be removed from the form after one day. The fiber cement then must harden for about one month. **5** Every piece is marked and not just with the production date but rather with the name of the craftsman who made the piece as well. Because everyone is proud of the quality of his work.

FIBER CEMENT : NATURAL MATERIAL

THE MATERIAL Fiber cement is made from the natural materials cement, powdered lime stone, fibers, air, and water, and it has been completely free of asbestos for around 30 years. Plants love this natural, breathable material, which regulates moisture. Fiber cement is also solid colored. Therefore, there is no danger of chipped color surfaces or fading in a planter. In brief: fiber cement is exceptionally long lived and can be completely recycled.

5-YEAR GUARANTEE AGAINST FROST DAMAGE

Production processes and materials make eform planters completely resistant to frost. All that is needed is correct handling. Excess water must be able to drain through the openings in the bottom of the pot, because as soon as water freezes, it can cause expansion cracks. Every eform pot comes with a 5-year guarantee against frost damage from the date of purchase.

1 Eternit (Schweiz) AG factory in Payerne designed by Paul von Waltenspuhl which began operations in 1957. **2** Components for the manufacture of fiber cement. **3** Form for manufacturing the Geisha planter. **4** The wet semi-finished product is pressed through rollers before it is worked further by hand. **5** Plastic fibers, which add strength to the material. **6** Special tools for working the forms by hand. **7** After shaping, the products harden completely within one month.
